

Airway Management

Airway FUNDamentals

Have you ever wanted more airway experience? Would you like to learn lessons in a few hours that I have learned over the past years in anesthesia and flight nursing? In this class you will learn airway management basics: take a new look at airway anatomy, cricoid pressure, how to evaluate external features that could indicate a difficult mask ventilation or laryngoscopy, learn proper use of airway adjuncts and blade placement. Through real pictures and interactive hands on practice, you will apply what you have learned to different scenarios. Have new tricks to use for your next airway call!

Roni Bursch has been a CRNA (Certified Registered Nurse Anesthetist) since 1994 and is a former Flight Nurse with CALSTAR. Her unique perspective will provide insight into the skills that are necessary for the prehospital professional.

She is the founder of Airway Queen, Inc., an education company dedicated to serving her colleagues in EMS.

7/16	Fri	8AM-4:30PM	SFPA	8
9/13	Mon	8AM-4:30PM	SFPA	8
11/1	Mon	8AM-4:30PM	SFPA	8

Airway FUNDamentals Member \$100 Non-Member \$115

Advanced Airway Management

Intubation is a difficult skill to master and retain. In today's challenging environment the EMS professional may have few, if any opportunities to perform this critical task annually. The SFPA is proud to present Dr. Richard Levitan, best known for the AirwayCam® video series, who will lead an intensive workshop in advanced airway management. Using a combination of academics and intensive practice sessions on realistic simulators, Dr. Levitan will help refine your technique and approach to good airway control.

Day Date Time Location

Nothing scheduled, check website for class dates.

Cadaver Workshop Member \$TBA Non-Member \$TBA

Cadaver Airway Workshop

This session is designed to give you the opportunity to practice the skills learned in the Advanced Airway Management Workshop. Low body-to-participant and high instructor ratios will provide a significant amount of hands-on training time for learners in the class. This class will meet at the Medical Examiners office in San Francisco. Please review the critical information provided below about class seating priority.
